

Water Savers

FOR YOUR HEALTH

TIP OF THE MONTH!

& THE ENVIRONMENT...

Streamline your Serviceware!

- PHASE OUT PLASTIC CUPS, CONTAINERS, UTENSILS
They shed microplastic particles and are very difficult to recycle. AVOID BLACK PLASTIC as it often contains harmful chemicals. NEVER HEAT PLASTIC!
- PAPER CUPS & PLATES usually end up in landfills
- CERAMIC (NOT OLDER/VINTAGE) is usually safe & clean
- GLASS is great! Clean, cheap, recyclable
- NON STICK PANS gradually shed chemicals
- STEEL, IRON & COPPER are the BEST!
